

Job Description: DevOps Engineer

About Capitols

We are a young startup located in the heart of Tel Aviv, New York City and London, founded by serial and successful entrepreneurs in the global Fintech market. We are in the business only for the past year, but we are already heavily backed by the leading VCs: Sequoia Capital and Index Ventures.

Join us to revolutionize the capital markets industry and get exposed to the largest banking market. We develop new technology models providing new business opportunities for the global tier 1 & 2 banks and clients in two of the largest financial markets - equity swaps and foreign exchange.

We are excited to grow the team! We are looking for talented, smart and creative people to join our R&D center in Tel Aviv and help us lead the path and make an impact on the global financial market.

Role Description

Capitolis is looking for a professional, experienced and curious DevOps Engineer to join our team, and take an active part in designing, implementing and maintaining complex financial infrastructures in a high paced production environment.

Your main challenges will be:

- Supporting an exactly-once with zero data loss transaction processing system.
- Deploy and maintain infrastructure automation and configuration management tools
- Design and implement orchestration solution for dozens of containerized micro-services.
- Support, improve and upgrade a continuous deployment environment.

- Deploy, manage and monitor advanced security solutions to protect high volume/value trades and transactions.

Requirements

- At least 3 years of experience as a DevOps
- Broad understanding of networking
- Experienced with Docker containers management and orchestration
- Experienced with Continuous integration tools
- Experience with building and supporting infrastructures for high volume data and data processing (NoSQL DBs, stream processing, message queues, etc.)
- Experience with IaaS cloud solution (preferably AWS)
- At least one scripting language
- Good interpersonal communication and written skills in English
- Exceptional troubleshooting and problem-solving skills
- Self-motivated and able to work in a fast-paced environment
 - BS in Computer Science or related field, or equivalent experience – plus
 - Real passion to technology

Location: Azrieli Building, Round Tower, Tel- Aviv
