CAPITOLIS

Job Description: **Full Stack Engineer**

About Capitols

Established in 2017 by some of the most experienced and successful technology and finance entrepreneurs in the world, we are Capitolis – a Fintech company where capital meets markets. We are located in the heart of Tel Aviv, New York City and London and have attracted funding by world class technology VCs: Sequoia Capital and Index Ventures.

We are revolutionizing the capital markets industry: we are developing new technology models providing new business opportunities for the global banks and their clients. Our products and services are truly ground-breaking. We can do this because we have deep expertise in finance and tech working at the biggest institutions, and because we want to make the capital markets a place of better connectivity and more opportunity.

We are now at the next stage of our journey and excited to grow the team! We are looking for talented, driven, and creative people to join our R&D center in Tel Aviv and help us make an impact on the global financial markets. We want you if you love working with technology and like to challenge convention, like an exciting working environment which never sits still.

Role description

We are looking for an experienced full Stack Engineer who would be excited crafting a beautiful UI using React and Node.js.

A true team player who is eager to be part of a very unique opportunity in the startup scene.

Responsibilities

- Create high quality responsive UI application.
- Apply web standards for accessibility, responsive design and support all browsers/devices.
- Sharing knowledge as well as leading correct technological processes.
- Work closely with designers, developers and QA.

Requirements:

- o At least 3 years of experience with a popular JavaScript front end framework (Backbone/Angular/React/Ember).
- o At least 2 years of experience with Node.js or any other backend web framework.
- o Solid and deep knowledge of CSS3, HTML5 and ES6/JavaScript.
- o Experience in React-Redux or equivalent store management library like Mobx.
- o At least 1 years of experience with React.
- o Familiarity with modern frontend builds pipelines and tools such as Babel, Webpack, NPM, etc - Advantage.
- o Knowledge of front-end CSS frameworks like Bootstrap, Material UI - Advantage.
- o Self-learning, independent and communicative.
- o Detail oriented and highly responsible.
- o Bachelor's degree in Computer Science or equivalent.

Location: Azrieli Building, Round Tower, Tel- Aviv
