CAPITOLIS

Job Description: QA Engineer

About Capitols:

We are a young startup located in the heart of Tel Aviv, New York City and London, founded by serial and successful entrepreneurs in the global Fintech market. We are in the business only for the past year, but we are already heavily backed by the leading VCs: Sequoia Capital and Index Ventures.

Join us to revolutionize the capital markets industry and get exposed to the largest banking market. We develop new technology models providing new business opportunities for the global tier 1 & 2 banks and clients in two of the largest financial markets - equity swaps and foreign exchange.

We are excited to grow the team! We are looking for talented, smart and creative people to join our R&D center in Tel Aviv and help us lead the path and make an impact on the global financial market.

Role description:

We are looking for an experienced hands-on QA engineer with proven abilities to deliver fast and efficiently. A true team player who is eager to be part of a very unique opportunity in the startup scene.

Qualifications & Experience:

- At least 3 years of experience as QA Engineer for Enterprise products
- B.Sc. in Computer Science or other relevant fields
- Able to find and analyse system and software problems quickly and accurately
- Strong analytical skills
- Great in collaboration and communication with others and a true team player
- Familiar with SQL and/or NoSQL DBs
- Knowledge of common testing frameworks
- Excellent English - spoken and written
- Financial affinity - significant advantage
- Experienced with writing automated QA tests – an advantage
- Customers oriented - an advantage

Location: Azrieli Building, Round Tower, Tel- Aviv
